RaceDay Registration

1,109,909 Turkey Trot Participants

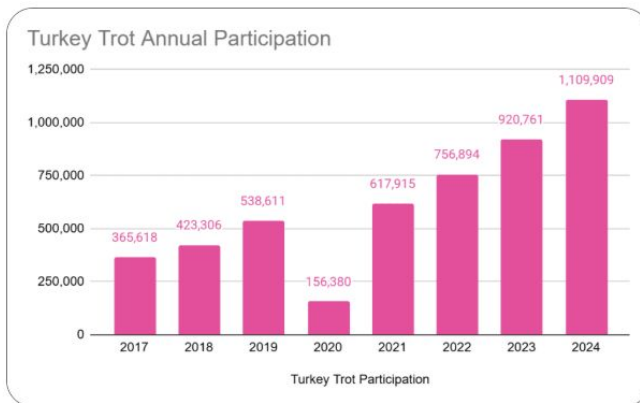

936 Races on Thanksgiving Day

322 Races With 1,000+ Participants

The headliner: the popularity of Thanksgiving Day races on RunSignup continues to grow and has nearly doubled pre-pandemic participation after a brief drop in 2020.

Intro to Onsite Registration

- Packet Pickup and On Site Registration Registration is likely the first time your athletes get face time with you
 - Being organized and prepared for challenges is the key to a smooth race day
 - Test out technology IN ADVANCE!!!!
- By setting expectations in advance, you can limit confusion
 - Clearly state whether or not you are accepting onsite registrations
 - Ensure you have registration OPEN at RunSignup - if taking online registrations, even if using Kiosks only
 - Train your volunteers/staff

Intro to Onsite Registration

- Most events hold onsite registration during Packet Pick Up (PPU)
 - However the RunSignup On Site Registration page can be used as a registration station at any point after being turned on.
 - Some events have set up registration stations at running stores or sponsor locations as a standing registration spot for those captive audiences.
- Multiple types of onsite registration can help keep lines to a minimum
- Also by having regularly promoted price increase intervals, athletes are pushed to register early to limit late registrations and help Race Directors and Timers project how many athletes they should expect for event specific orders (bibs/tags, give away items, cups, finisher medals, etc)

On Site Registration

0 Help

Perfect for a pre-race expo, packet pickup, or anywhere people need to sign up in person. On Site Registration is a simplified registration experience, requiring minimal data entry for your registrants.

1. Users are not automatically logged in after registering.
2. A "Next Registrant" button shows on the confirmation screen to start the next registration. This will automatically log out the current user if they have manually signed in.

Enable On Site Registration

Show Bib Assignment screen

☐ Allow the manual entry of a bib number at the end of an On Site Registration.

Restrict Events

☐ Only enable On Site Registration for specific events.

Customize Required Fields

IMPORTANT! By default, On Site Registration **ONLY** asks for this information: **First Name, Last Name, Email, Gender, Date of Birth, Phone, Street Address, Country, Zip Code, City, State (if applicable), Questions, and Donations.**

☐ I want to customize what information I collect.

On Site Registration ONLY

☐ **off** By turning this on, **online registrations will be disabled**. You can inform registrants of this restriction by customizing a closed message on [Registration Closed Settings](#).

Save Changes

Onsite Registration

BEST PRACTICES

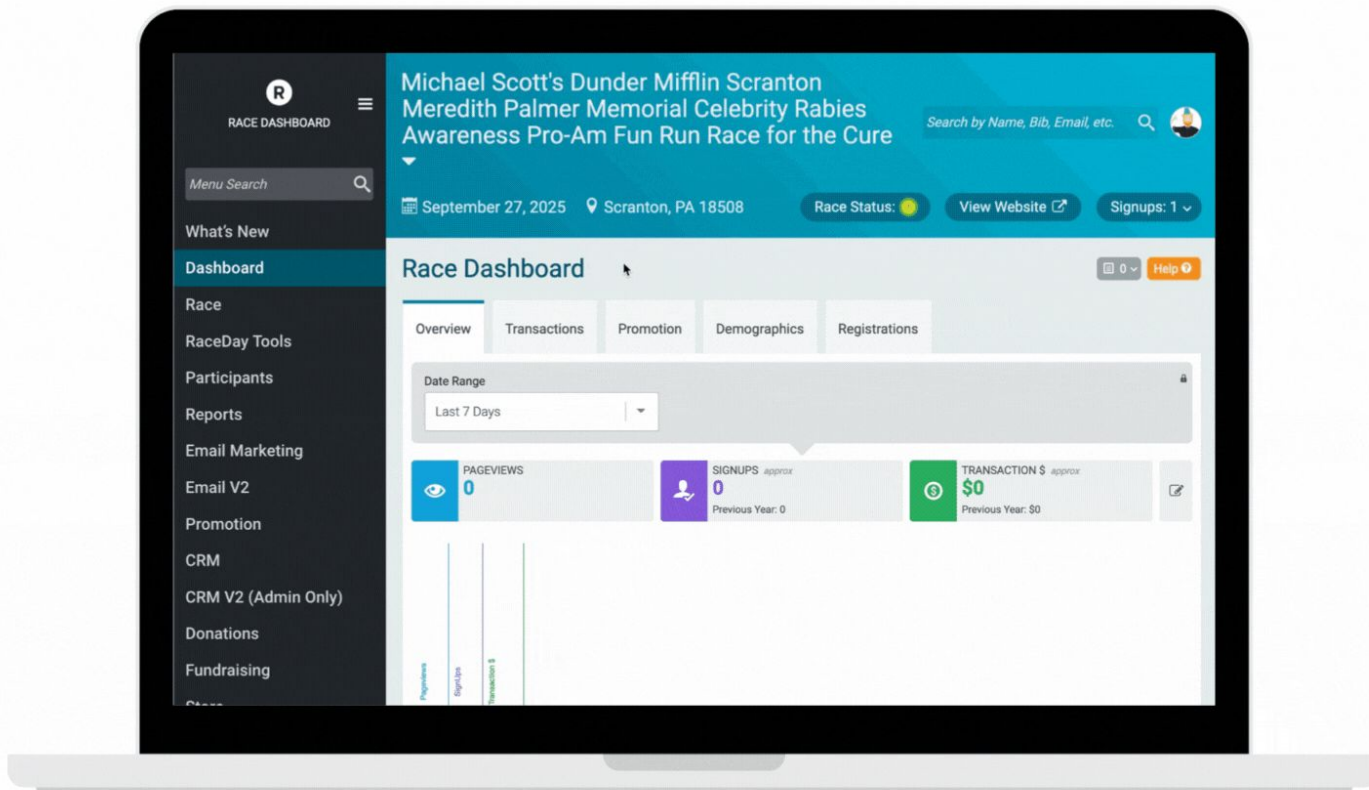

- Turn on On Site Registration well in advance and **TEST IT OUT!!**
 - Register yourself and demo this process to the volunteers who will manage the process.
- Set the homepage on any devices to the On Site Registration page
- Make sure your computers and tablets are updated and the CheckIn app is up to date
- Write down your On Site Registration password and cash password
 - **DON'T MAKE THIS THE SAME AS YOUR RunSignup Password!!**
- Print out QR Codes for regular registration (place around the PPU area), to allow folks with smartphones to register on their personal device
- If you are going to have limited to no internet access onsite, plan to cut off online registration **BEFORE** you download the last time and ensure you have printed out copies of an onsite registration form

Packet Pickup Tomorrow!

Bring this email with you tomorrow for
super fast packet pickup!

**Registration ID for Packet
Pickup**

Email Marketing

BEST PRACTICES

- Make sure that you are on the list to receive emails - this is another reason to have yourself registered for the race, and **TEST OUT YOUR EMAILS!!**
- Set your emails up well in advance - dynamic content populates regardless of when someone registers
- Use the RunSignup pre-built templates as a starting point
- Have QR codes for Registration IDs at the TOP of Packet Pickup/Race Day emails
- Consider an email to participants who are **NOT** checked in yet after early PPU reminding them to allow for extra time to get their bibs

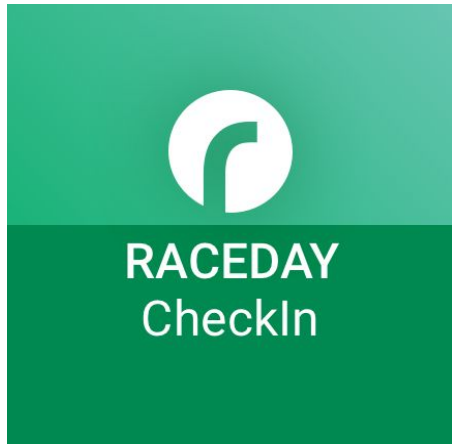

Streamlining RunSignup **Giveaway Inventories**

Giveaway Inventories

Utilizing the giveaway inventory tool in RunSignup, helps streamline Packet Pick Up and manage the athlete's expectations in advance of arriving on site.

- Easy to use
- No need to cut off giveaway selections
- Integrates with the RaceDay CheckIn App
- Don't forget a NO SHIRT option

Giveaway Inventories

Race >> Giveaways/Add-ons >> Giveaway Inventory

- Add a No Shirt option to all open events
- Provides a live breakdown of how many and of what sizes are still available
- NOTE: Changes in made in the CheckIn App will override the inventory amounts

RaceDay CheckIn

Participants & Volunteers

54% Of Turkey Trots Used the RaceDay CheckIn App

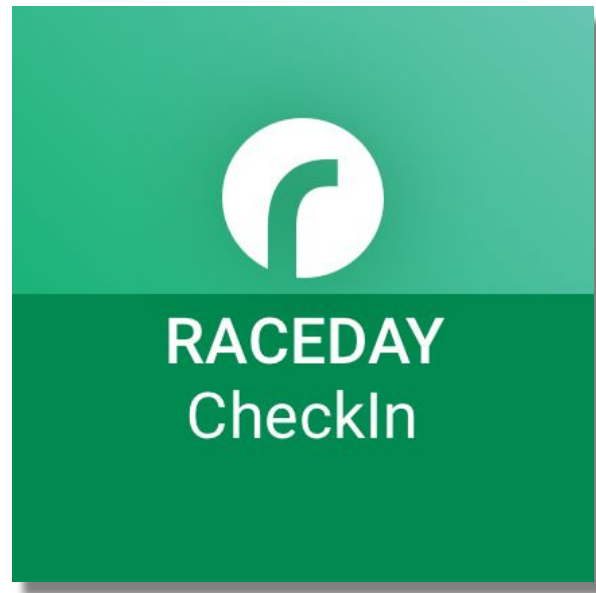

66% of Turkey Trot Participants Were Checked In With The App

Turkey trot participants have a busy day ahead of them, and waiting around in line is usually not on the list. RunSignup perennial favorite, the RaceDay CheckIn App continues to be the default way to streamline race day. In 2024, 54% of races used the app to check in 66% of Thanksgiving Day participants. That's more than 700,000 participants checked in by the RaceDay CheckIn App in a single morning.

RaceDay CheckIn App Usage					
	2019	2021	2022	2023	2024
% of Races Using the RaceDay CheckIn App	21%	33%	42%	57%	54%
% Participants Checked In by App	25%	48%	54%	60%	66%

RaceDay CheckIn App

- **Expedites** the check-in process for participants and volunteers
- **Dynamically Synchronizes** with other data points (registration, bibs, scoring)
- **Easily Process** check-ins and changes
- **Provides Insights** to race organizers
 - 2024 Thanksgiving Weekend -> ~700,000 CheckIns
 - Used across all event types and sizes throughout the U.S.
 - FREE tool for RunSignup registration customers
 - Available for Apple and Android phones and tablets

Key Settings

You MUST enable the CheckIn App in RunSignup before it appears in the app.

Save Settings

Key Settings

- Enable:
 - Require Bib
 - Auto-Show Camera on Bib Assignment
 - Giveaway
 - Allow Un-Check Ins
 - Prevent Duplicate Bibs
 - Validate Bibs

Additional settings (like waivers and event transfers depend on the specifics of your event)

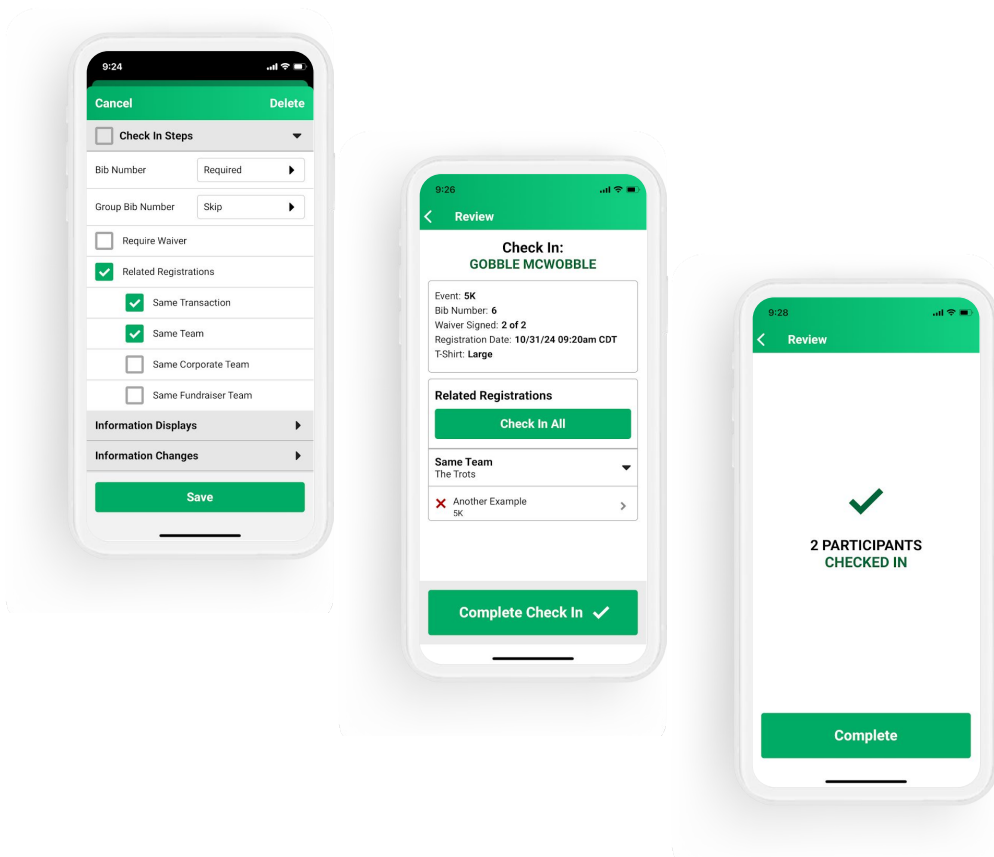

Checking In Multiple People

Using a new features to CheckIn multiple people at the same time

In your Preset:

- Select “Related Registrations”
- Select “Same Transaction” and “Same Team” (if applicable)
- Remember to write names on the back of the bib if handing out multiple bibs at once!

RaceDay CheckIn

BEST PRACTICES

- Have QR codes for Registration IDs at the TOP of Packet Pickup/Race Day emails and send them out the night before/morning of Packet Pickup
- Have QR codes printed on your bibs to speed up assignment (if using Dynamic Bib Assignment)
- Create at least one Preset/Configuration that works with your specific workflow
- Test everything out yourself and make sure the workflow is clear and easy to follow for both volunteers and participants
- Make sure all devices have the latest version of CheckIn, and that volunteers have the app downloaded if they are using their own devices
- Use the “Share” option in the CheckIn app to get volunteers to the correct Race
- **SET YOUR PASSWORD AND CHECK IN WINDOW!!**

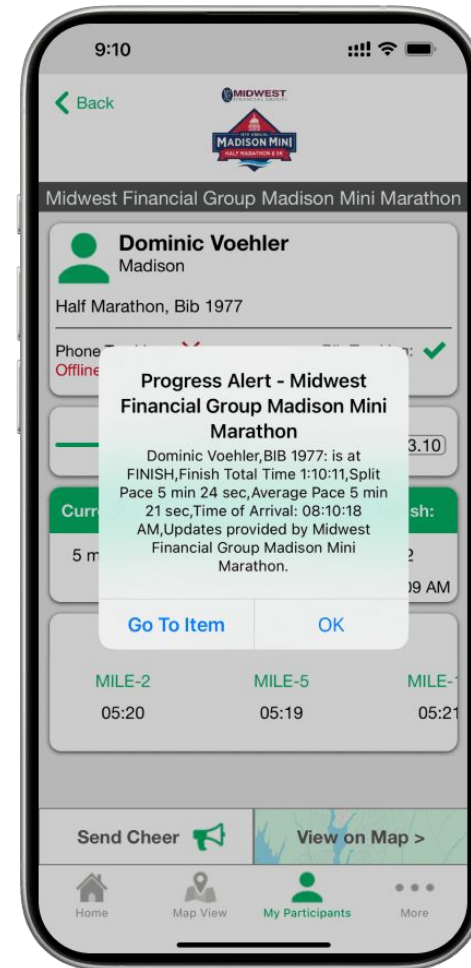

RaceJoy: A Natural for Turkey Trots

2024 RaceJoy Turkey Trot Numbers

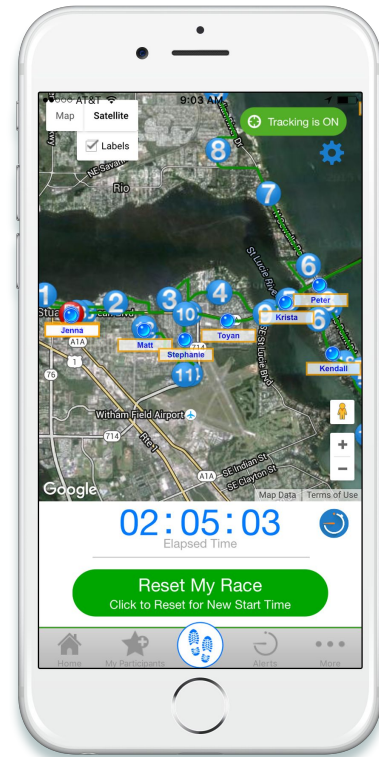

GPS Phones Tracked	7,119
Progress Timing Alerts	51,754
Cheers Delivered	19,785

Thanksgiving 2024 Stats
(32 RaceJoy Partners Providing Joy
Across 57 Events!)

A Perfect Turkey Trot Addition

- **Offer a socially connected event experience**
 - Participant tracking and cheer sending
- **Participants tracked by remote spectators through their phone**
 - Family and friends can track and send cheers while preparing the Thanksgiving feast.
- **Create custom Thanksgiving-themed audio experience (optional)**
 - Schedule to play at mile points along the course

RaceJoy Requires a Certified Timer

RaceJoy is only offered through Certified Timers

- Use <https://runsignup.com/timersearch> to see if your timer is certified
- Help facilitate a faster setup by knowing your course - bonus points for having a GPX/KML file handy!
- Make sure RaceJoy is set up at least 10 days in advance, and promote it!

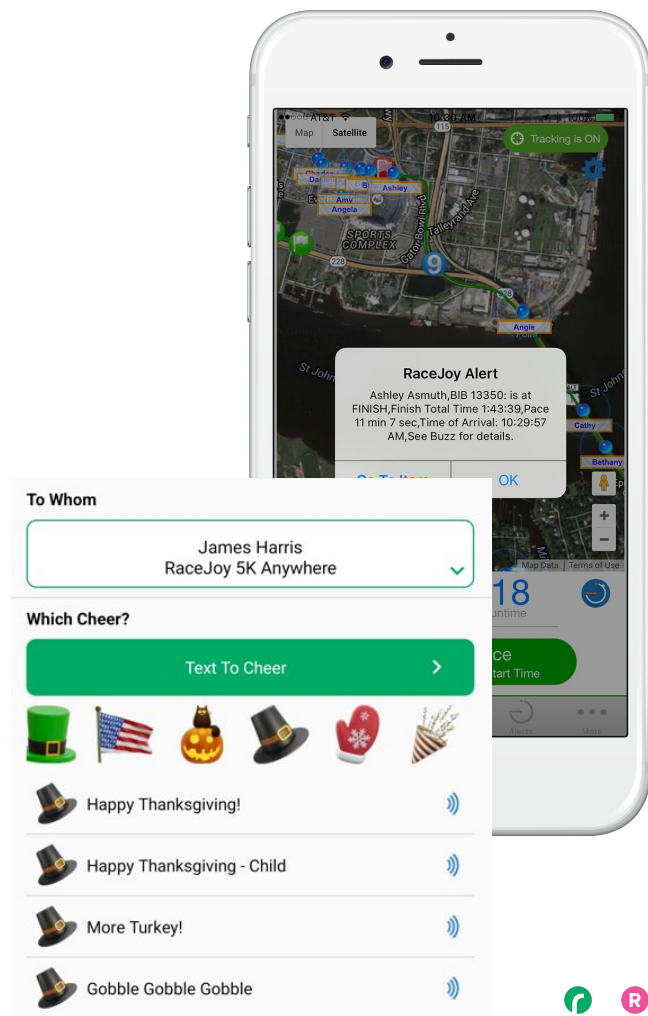

Exclusively Available through
RaceDay Certified Timers

Have your timer reach out to
info@racejoy.com **to get free**
certification course. (video &
quiz).

Additional Features

- **Spectators Send Thanksgiving Cheers**
- **Progress Updates: Every Mile**
- **Off Course Alerts (for on-site events)**
- **Results Integration**
 - Virtual events results pushed from app
 - In-Person results displayed in app
- **Central Monitoring & Communications System for Timers and Race Directors**

Race Day Monitoring System

Customize and adjust news alerts and progress alert messages

News

Display live tracking of participants to a large screen at the race site.

Individual race participant progress information like pace and estimated finish time

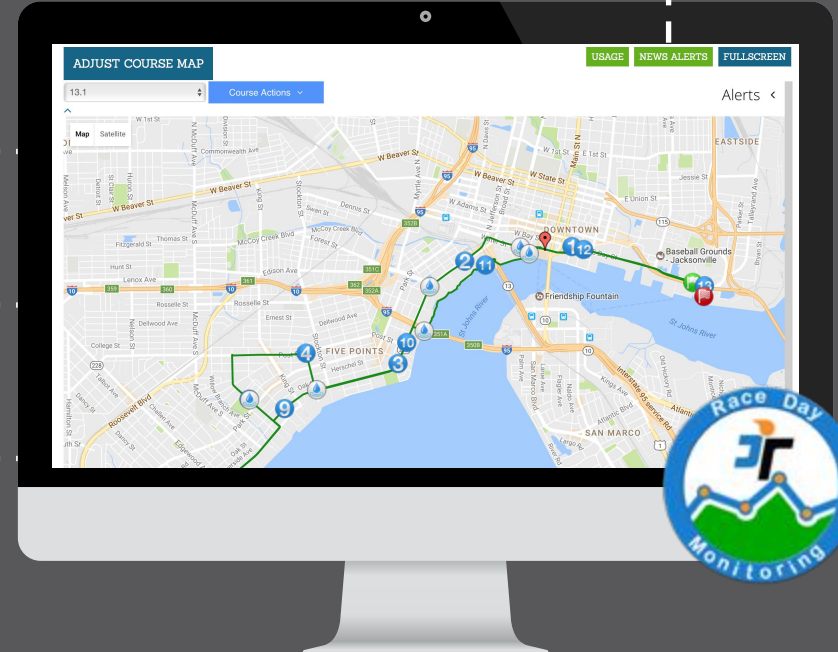

Global view of participants and operations

Access the number of participants who have crossed milestones

2

Send supportive audio messages from the race director to active participants (virtual or on-site)

RunSignup Results

23% Of Turkey Trots Sent Notifications

550,350 Notifications Were Sent On Thanksgiving

Results notifications sent (by email or SMS) also increased in 2024, with a record 219 races sending more than half a million notifications to participants and spectators. Notifications make race day more fun and engaging for runners and their “fans” alike.

Races Sending Notifications								
	2017	2018	2019	2020	2021	2022	2023	2024
# Races Sending Notifications	73	85	103	68	139	161	202	219
Notifications Sent	112,937	115,118	189,350	38,978	238,727	323,800	447,888	550,350

- Results can be pushed up live to RunSignup
- If activated, RunSignup will send text and email notifications to the athletes of their results
 - RaceDay Tools >> Results >> Set Up Results Notifications and Links

Setup

☒ Allow participants to sign up for text message and email notifications of results.

If you will be doing real-time results, check this box to enable people to sign up for notifications when a participant finishes the race.

 If you promote the text short code that RunSignup uses, you must present [SMS Terms and Conditions](#), Privacy Policy and disclosure that message and data rates may apply as well.

☐ Don't allow text message result notifications to be set up. Email notifications will still be sent.

Registrants who have already signed up for text notifications will still receive a text notification.

☐ Disable notifications for **5K Run/Walk Participant**

☐ Disable notifications for **Kids 1/2 Mile Fun Run**

☒ Disable notifications for **Phantom Runner**

Result notifications are not allowed for virtual events and challenges, but you can set up milestones with notifications ([instructions](#)).

☒ Yes, allow split notifications.

☐ Temporarily disable notifications.

This is useful when testing or if you post results several days after the event.

☐ Hide Participant Lookup & Tracking in Results.

If you do not want the Participant Lookup & Tracking option to display in results, check this box.

☐ Hide in public lists of races with recently updated results.

RunSignup Results

BEST PRACTICES

- Make sure your timer is aware of your reporting needs and is prepared to publish results live if you are using Text/Email notifications
- If you turn on Text/Email notifications late, send instructions to registrants for signing up after the fact
 - More information here:
<https://help.runsignup.com/support/solutions/articles/17000131484-setup-results-notifications-email-and-text-sms->
- Make it easy for participants to find the results link on your website
- Set up certificates in advance and make sure they look good!
- If you are using the Photos platform, set up your watermarks ahead of time (more on photos in a moment!)

RaceDay Photos

RaceDay Photos

16% of Races Uploaded Photos On Thanksgiving Day

102,643 Photos Were Uploaded On Thanksgiving Day

Improve the RaceDay Experience

- Happier participants creates repeat participants
- Positive word-of-mouth is powerful and effective marketing tool
- Social endorsement of your race increases registrations
- Helps to turn current spectators into future participants
- Turkey Trots are often the only race some people run each year - you can change that and reach a new audience

Make RaceDay Last Forever

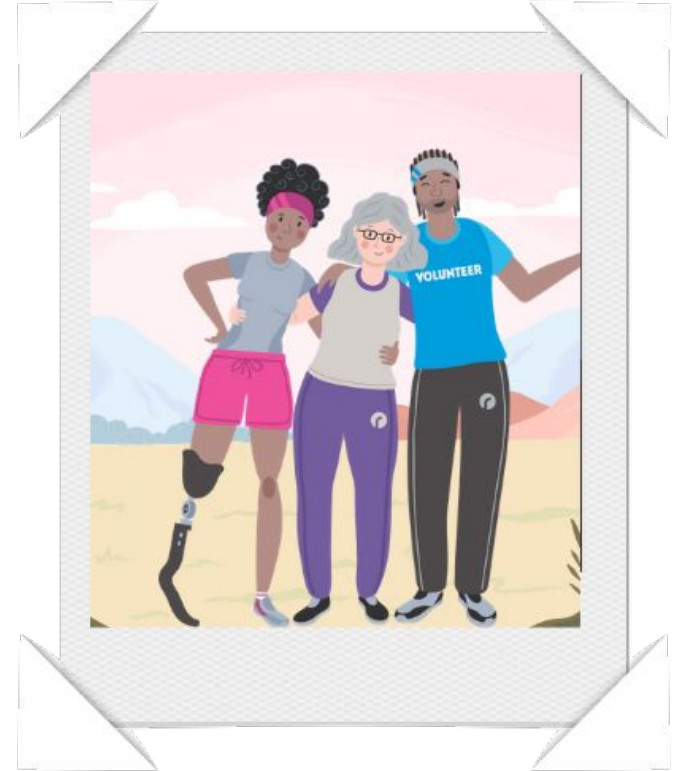

Photos are shareable assets that:

- Bring participants back to your race website after the event concludes
- Provide an instant reminder of the fun of the day
- Can be printed as a permanent keepsake from your event
- Make ideal images to use in future advertising for your event

Photos Connect People

- Photos are downloadable and easy to share on Facebook
- Friends and family who see shared photos are more likely to express an interest in joining in the future.
- Photos (and participant uploads) connect virtual and in-person participants
- Watermarks on photos provide you an additional branding opportunity or sponsor reward.

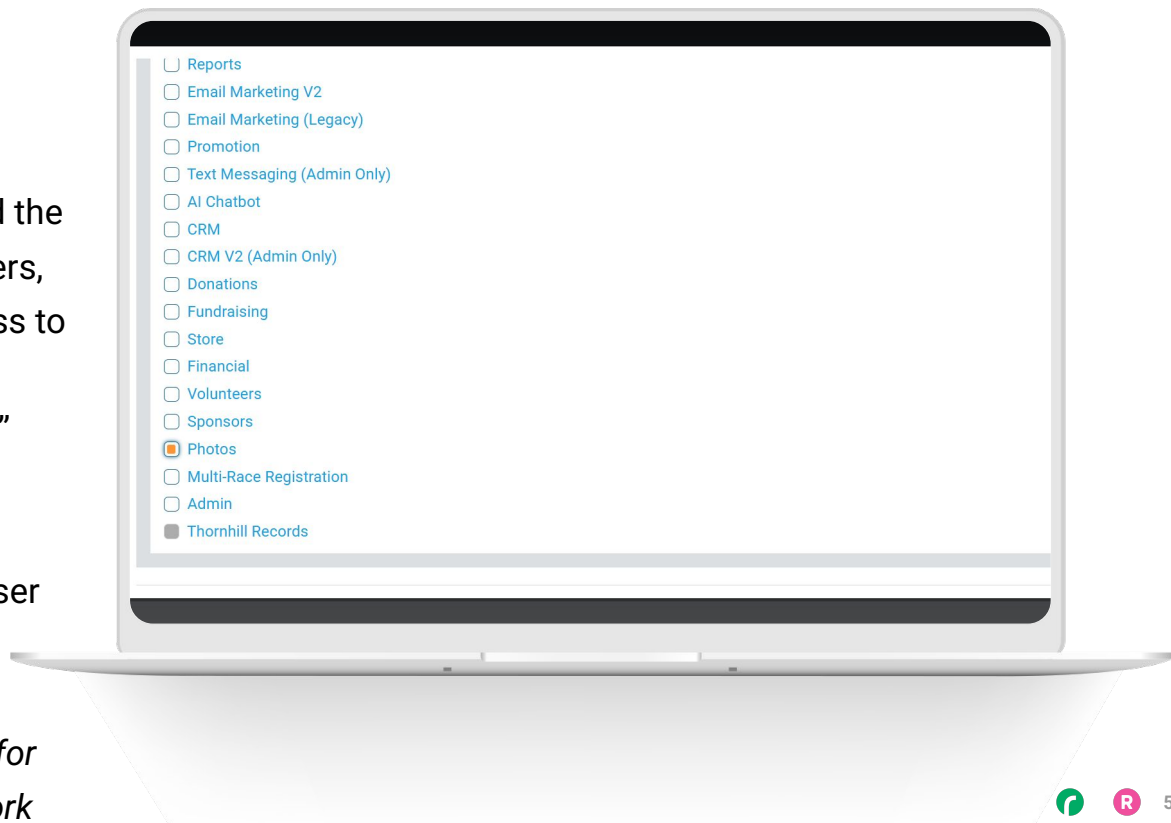

Set up Photo Access

Users must have access to photos to find the Race in the import step - this can be Timers, Race Directors, or Dashboard Page Access to Photos

- Go to “Secure Access/Info Sharing”
- Set Up Dashboard Page Access
- Add Access
- Photos must be checked for this user

Note: the user must be logged in to the RunSignup account with this access level for the OAuth step of importing the race to work

Photos Setup

The screenshot shows the RaceDay Photos Setup interface. On the left is a dark sidebar with a search bar and a list of menu items: Dashboard, Race, RaceDay Tools, Participants, Reports, Email Marketing, Promotion, CRM, CRM V2 (Admin Only), Donations, Fundraising, Store, Financial, Volunteers, Sponsors, Photos, Marketplace, and Multi-Race Registration. The 'Photos' item is highlighted in blue. A pink arrow points from the 'Photos' item in the sidebar to the 'Photos Setup' link in the main content area. The main content area has a light blue header with the word 'Photos' and a sub-header 'Photos Setup' with the description 'Modify photo and watermark settings.' Below this are three sections: 'Upload Photos' (Upload photos to albums.), 'View & Manage Photos' (View photos, update bib tags, and delete photos.), and 'Photo Albums' (Edit album names and view album stats.).

Photos Examples

Introduction to **Mobile Timing Photos**

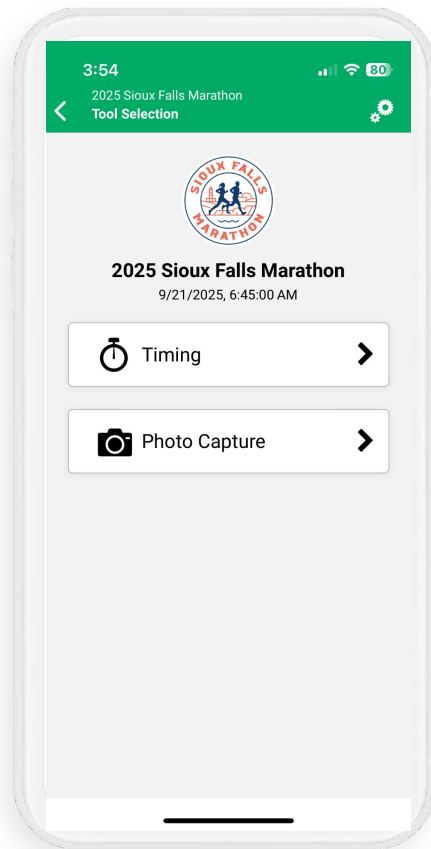

RaceDay Photos

- A fully integrated solution to allow volunteers/staff to take photos on Race Day and have them automatically uploaded to the RunSignup Photos platform which will detect and tag bib numbers and match them to results automatically.

Standalone Photo Capture

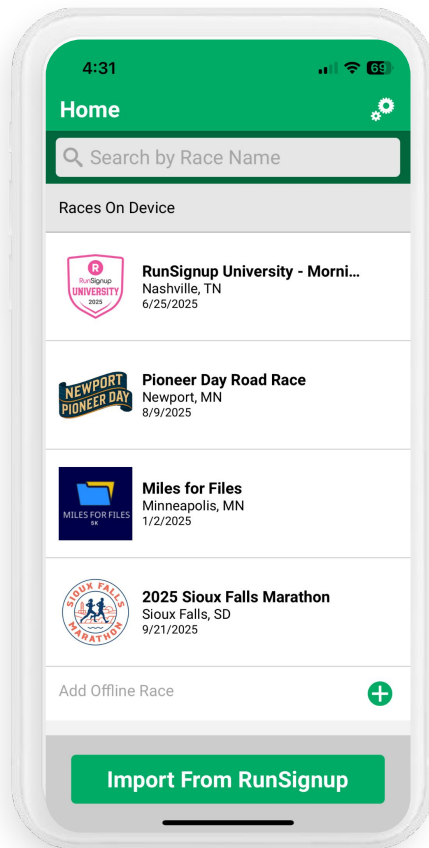

- Import Race from RunSignup.
- Select Photo Capture
- Create an Album to place photos in, or select an existing one.
- Take photos!
- Photos are automatically uploaded to RunSignup's Photo Platform and tagged with bib numbers.
- Photos are automatically linked to Results when they are published.

Import a Race from RunSignup

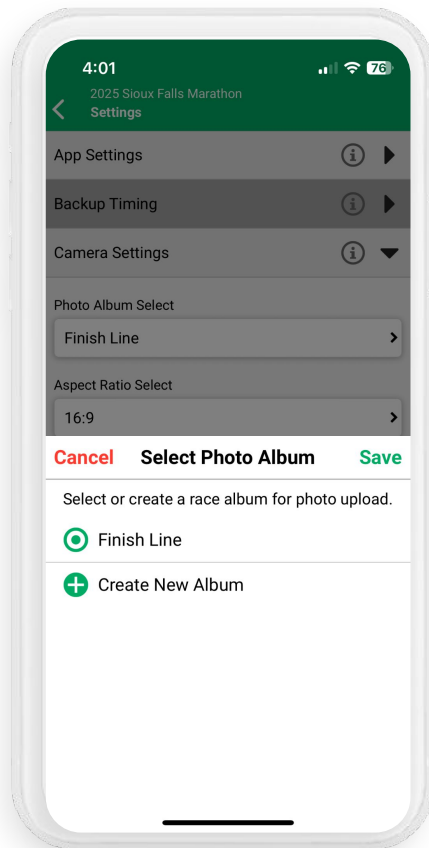

- Import from RunSignup
- Allow Access from the OAuth if not logged in/authorized
- Select the race photos will be taken for

Import a Race from RunSignup

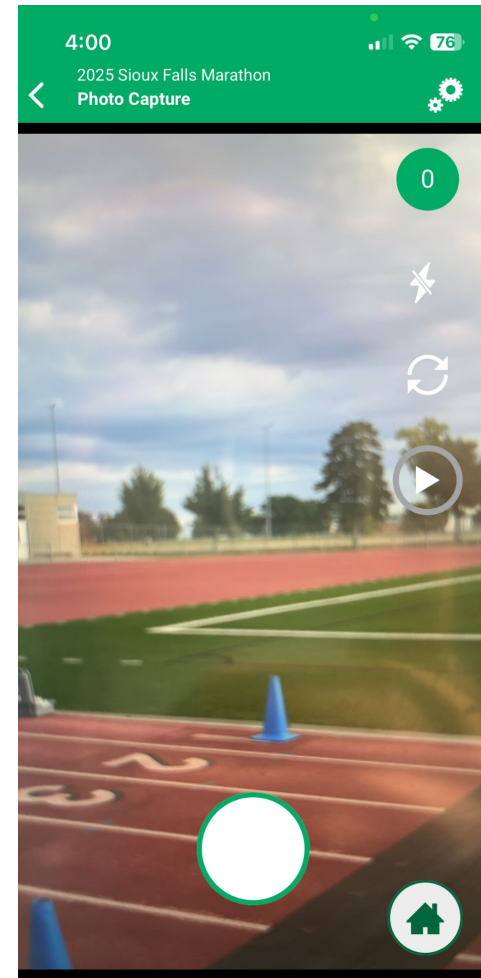

- Select Photo Capture
- Select or create a race album for photo upload
- Keep in mind this name should be descriptive and for public consumption!

Main Screen

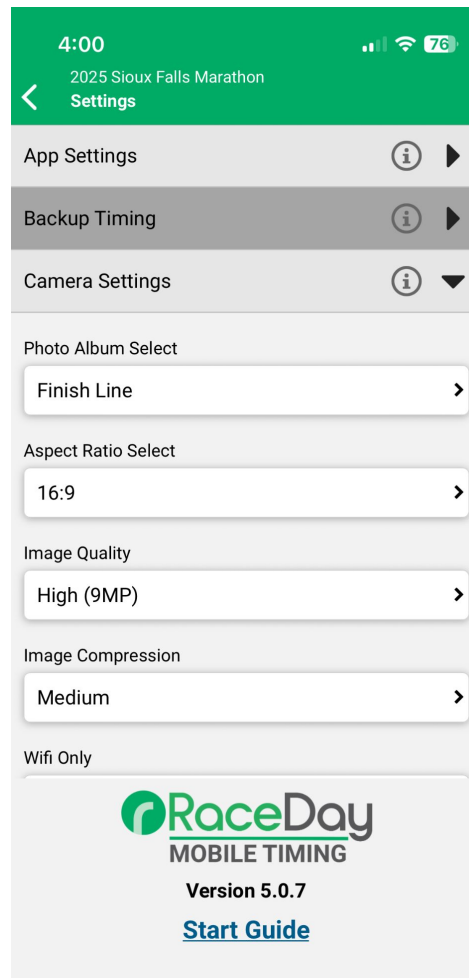

- **Settings** are found in the “Gear” menu in the upper-right corner
- **Count** indicates how many photos have been taken, and if any are not uploaded
 - Green means all are uploaded
 - Yellow means some are not uploaded
 - Red means there are photos waiting to be uploaded and the number pending has not changed for more than 15 min (or you have no connection)
 - Tapping on this number will tell the number of photos taken and the number remaining to upload
- **Flash** on/off
- **Flip** camera (not recommended)
- **Auto-Capture** status
- **Manual capture** button (or use a bluetooth clicker!)
- **Race home** (within Mobile Timing)

Settings pt. 1

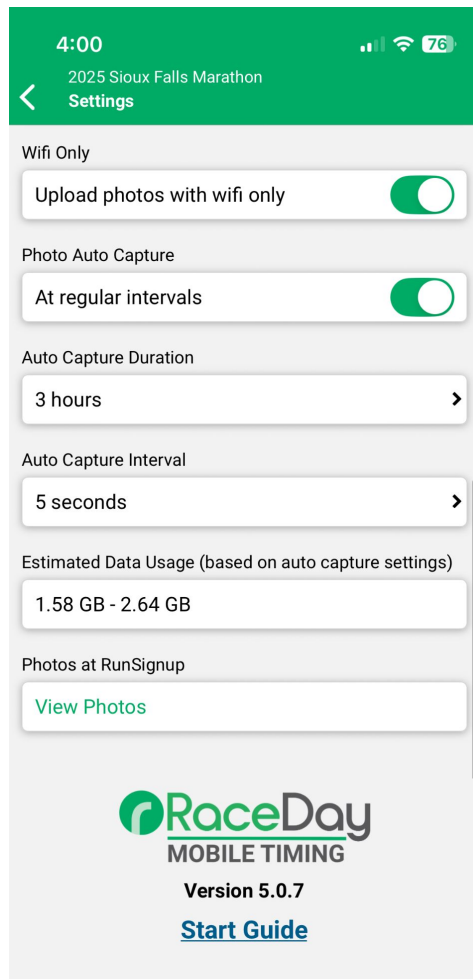

- **App Settings** - login info (RunSignup) and Device Name
- **Photo Album Select** - Select where photos will upload or create a new album
- **Aspect Ratio Select** - 4:3 or 16:9
- **Image Quality** - High, (9MP) Medium (5MP), Low (2MP)
- **Image Compression** - High, Medium, or Low

Settings pt. 2

- **Wifi Only** - Only uploads when on Wifi - photos will not upload until the user opens the app on a Wifi network.
- **Photo Auto Capture** - turning on requires you to “start” auto-capture
- **Auto Capture Duration** - How long should the app auto-capture for (from start of “play”) in hours
- **Auto Capture Interval** - How often should it capture in seconds
- **Estimated Data Usage**
 - If auto capture is on, this is the estimate for the entire duration
 - If off, it is the estimated data usage for 100 photos
 - This is based on quality and compression and is an estimate
- **Photos at RunSignup** - View the photos!

Best Practices

- ALWAYS set at least one watermark
- Test your framing - you can set up a Test album and delete it (and the photos in it) once you have your framing and logo sizing correct
- If your logo is too big or you have an alternate logo you want to use, set up a Hidden Sponsor
 - Sponsors -> Manage -> Hide this sponsor on your race website

Best Practices

- Make sure your numbers are easily visible!
- 4 digit bib ranges are best
- Good “Kerning” helps - just don’t ask us to define it (kidding, it’s the spacing between characters)
- If you’re pulling photos, the url format is:

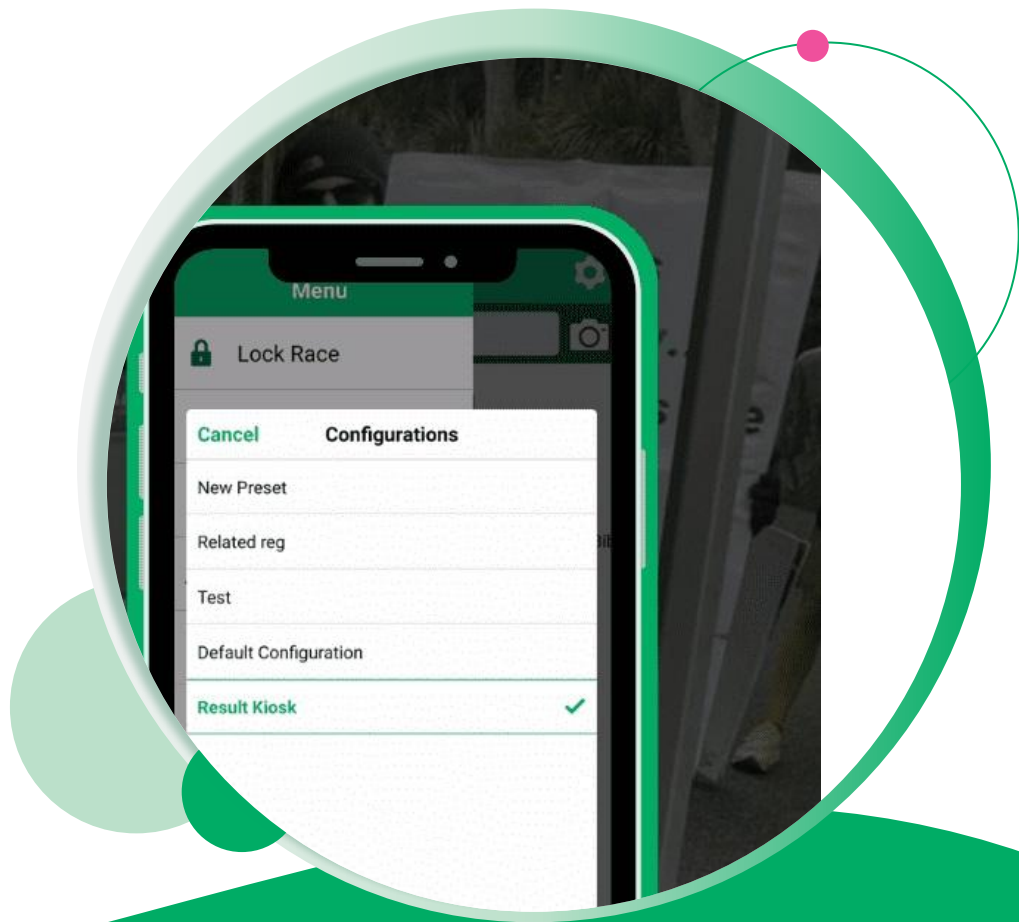

[https://runsignup.com/Race/Photos/\[raceID\]/\[set\]/\[bib\]](https://runsignup.com/Race/Photos/[raceID]/[set]/[bib])
